Summary of Progress this Report

The team worked on creating our Requirements Lighting talk presentation that we gave to the class on Thursday. We also established when we would be meeting with our advisor for our first meeting. We are hoping to get a clearer image of how we are going to tackle our design.

Pending Issues

We have yet to get a clear group understanding of how we are going to approach this project. We were waiting to hear feedback from the class before we decided on one clear path, and we are going to talk with our advisor on Monday to help us decide that.

Plans for Upcoming Reporting Period

Breaking the areas of our project into hardware and software issues and attempting to fill out the black box of what we all have to do for the project. We will also be able to report on what we discussed in our meeting that we are going to have on Monday, and hopefully, we can determine what our starting steps are going to be.
