Summary of Progress this Report

This week we focused on competing for our proposed design document and continued research for both software and hardware.

Pending Issues

The hardware team is currently arranging a good time to meet with Dr. Phillip Jones in the CprE department. We have already communicated, establishing that we would like to meet, currently we are trying to align a good time for all of us to meet together. We are hoping to meet with Dr. Jones as soon as possible within the next two weeks.

Plans for Upcoming Reporting Period

Research is going to continue for both sides as we try to narrow down what software and APIs we are going to use along with having a list of hardware components for us to decide between.
