This week we worked on combining all of our weekly reports into one single final design document. We spent our weekly meeting time and class time as our dedicated time to work on it. Knowing that we will be giving a presentation within a few weeks covering our story so far and how it ties in with what we have written in our design document, we have also managed to work ahead slightly and start constructing our PowerPoint.

The Hardware Team has also sent in our Bill of Materials with our listed parts needed for testing.
